Contents

1 History

v0.1.0 : Initial version.

2 The wordle package

2.1 The game

Wordle is a web-based word game created and developed by Welsh software engineer Josh Wardle. Players have six attempts to guess a five-letter word, with feedback given for each guess in the form of colored tiles indicating when letters match or occupy the correct position. Every day, a five-letter word is chosen which players aim to guess within six tries. After every guess, each letter is marked as either green, yellow or gray: green indicates that letter is correct and in the correct position, yellow means it is in the answer but not in the right position, while gray indicates it is not in the answer at all. Multiple instances of the same letter in a guess, such as the "o"s in "robot", will be colored green or yellow only if the letter also appears multiple times in the answer; otherwise, excess repeating letters will be colored gray.

https://en.wikipedia.org/wiki/Wordle

2.2 The package

This package can display, in a `tex` file, a wordle grid (with Ti*k*Z and within a `minipage`), with ability :

- to change dimensions and colors ;

- to pick style for misplaced letters ;

- to change borders and corners ;

- to print or not the letters.

It's possible to "play" with other words than five-letter words !

Most of source code, in LaTeX3, is given by thread from `tex.stackexchange`, proposed by user 3141592653589793238.

2.3 Loading of the package, used packages

The package `wordle` loads within the preamble.
There's no option, and `xcolor` isn't loaded.

```
\documentclass{article}
\usepackage{wordle}
```

`wordle` loads the following packages and libraries :

- `tikz`;

- `simplekv` ;

- `xstring`.

It's mostly compatible with latex, pdflatex, lualatex or xelatex compilation !

3 WordleGrid environment

3.1 Environment

The environment to display a Wordle grid is `WordleGrid`.
It works with keys, between `[...]` and needs to know :

- the good word ;

- the different guesses.

The code create the grid and the colors !

```
\begin{WordleGrid}[keys]{good word}
    guess n°1
    guess n°2
    guess n°3
\end{WordleGrid}
```

the grid is created with a `minipage`, with automatic width and spacings !

```
%default output
\begin{WordleGrid}{REBUS}
    ARISE
    ROUTE
    RULES
    REBUS
\end{WordleGrid}
```

3.2   Clés et options

The first argument, mandatory and between [...], proposes the following ⟨keys⟩ :

- ⟨Colors⟩ : = colors of the boxes ⟨back,misplaced,good⟩ ;

  default : ⟨WordleBack,WordleBad,WordleGood⟩,

- ⟨Rounded⟩ := arc for corners, in mm ;   default : ⟨0.1⟩
- ⟨Unit⟩ := width of cases, in cm ;   default : ⟨1⟩
- ⟨Font⟩ := font for letters ;   default : ⟨\LARGE\bfseries\sffamily⟩
- ⟨ColorLetters⟩ := color for letters ;   default : ⟨white⟩
- ⟨BorderColor⟩ := color fot the border ;   default : ⟨white⟩
- ⟨Letters⟩ := boolean to print letters ;   default : ⟨true⟩
- ⟨Style⟩ := style within ⟨default / other⟩ to change the style ;   default : ⟨default⟩
- ⟨Thick⟩ := thickness of the borders, in mm.   default : ⟨0.25⟩

The second argument, optional and between {...} is the correct word.

Different guesses are given within the body of the environment (line by line or space separated).

## 3.3   Examples

```
\begin{WordleGrid}{BURGH}
    ABATE
    HERBS
    BURLY
    BURGH
\end{WordleGrid}
%
\hspace{5mm}
%
\begin{WordleGrid}[Style=alt]{BURGH}
    ABATE HERBS BURLY BURGH
\end{WordleGrid}
```

```
\begin{WordleGrid}
        [Thickness=0.3,BorderColor=black,%
        Colors={lightgray,orange,teal}]{BURGH}
    ABATE
    HERBS
    BURLY
    BURGH
\end{WordleGrid}
%
\hspace{5mm}
%
\begin{WordleGrid}
        [Rounded=0,Thickness=0.3,BorderColor=black,%
        Colors={lightgray,orange,teal}]{BURGH}
    ABATE
    HERBS
    BURLY
    BURGH
\end{WordleGrid}
```

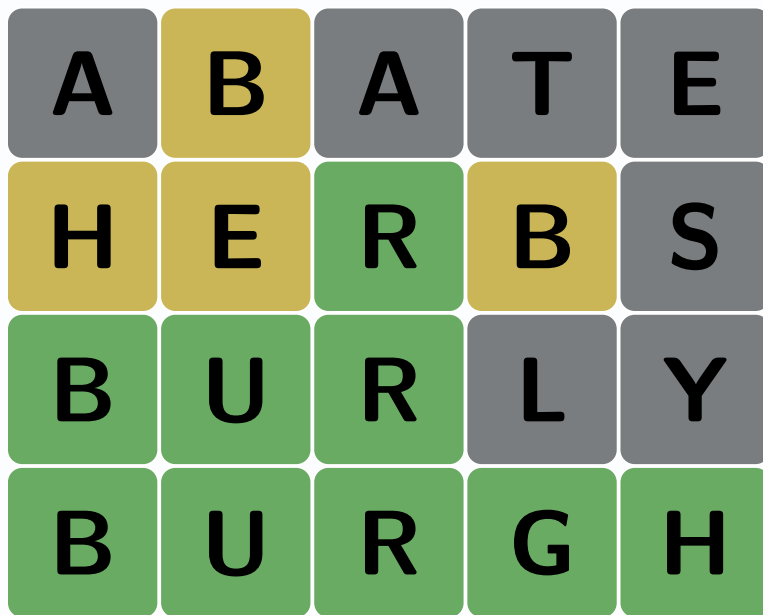

```
\begin{WordleGrid}[Unit=2,Font=\Huge\ttfamily,ColorLetters=black]{BURGH}
    ABATE
    HERBS
    BURLY
    BURGH
\end{WordleGrid}
```

```
\begin{WordleGrid}%
        [Unit=0.75,Rounded=0,Colors={cyan,orange,violet},Letters=false]{BURGH}
    ABATE
    HERBS
    BURLY
    BURGH
\end{WordleGrid}
\hspace{5mm}
\begin{WordleGrid}%
        [Unit=0.75,Rounded=0,Colors={cyan,orange,violet},Style=alt]
        {BURGH}
    ABATE
    HERBS
    BURLY
    BURGH
\end{WordleGrid}
\hspace{5mm}
\begin{WordleGrid}%
        [Unit=0.75,Rounded=0,Colors={cyan,orange,violet},Style=alt,Letters=false]
        {BURGH}
    ABATE
    HERBS
    BURLY
    BURGH
\end{WordleGrid}
```
